

●●●● LUMEN 170 ●●●●

170 lumen waist belt

Weight: 6.6 oz (188 g)
Total Volume: 9.7 c.i. (.16 L)
Sizing Range: 26" to 42" (66-106 cm)

ADVANTAGES

There are numerous advantages of a waist-mounted light. A few key things are that light shines lower on the trail or road ahead- casting shadows over the rocks or other obstacles providing a greater depth of field from the wearer's view. Better detail and clarity means quicker reaction time, and increased speed with confidence while moving in the dark or low-light conditions.

By removing the light source from your head, you also avoid the effect of "tunnel vision" or the tunnel effect experience where the light falls off rapidly from the side views. The Lumen 170 light has a focused center with wide-angle peripheral light for a natural running experience.

The silicone gripping rings on the Lumen 170 allows for 180° directional rotation with a range of motion adjusting 90° up and 90° down and anywhere in between. Easy to adjust and stays put at the angle you set.

THE ULTRASPIRE BELT DIFFERENCE

This is not your average waist belt with a basic straight line that goes around the waist. UltrAspire's belt design maintains a unique conical shape which curves and forms properly and comfortably around your waist or hips. Fast and comfortable, a fuss-free buckle secures the belt around the waist while removing irritating buckles on the belly. The waist belt has dual-sided adjustability with the body of belt comprised of comfortable and breathable large-holed micro-fiber polyester mesh. The same mesh used in UltrAspire's award winning race vests. Carry items such as energy foods, extra batteries, or other essentials in the front zippered pocket. Bright elastic binding for comfort and reflective hits for added visibility so you can see and be seen! The sizing is adjustable from 26" to 42" (66-106 cm).

LED LIGHT

With 170 lumens blazing the terrain ahead, the Lumen 170 uses a Super Bright Cree LED with aluminum reflector. Utilizing a simple push-button control, the light can operate in 4 modes. Push button once for "On" which is also the High setting. Press again sequentially for Medium, Low, S.O.S., and "Off". Button pressed after 4 seconds will go straight to "Off".

The aircraft-grade aluminum housing is water, dust, and impact resistant. Tempered glass lens for clarity.

NOTE: When the Lumen 170 is left on "High" the light's output may appear to decrease (after 1 hr of burn time). This is a design function that helps conserve power and reduce the heat and wear on the battery. To return the light to a brighter strength, simply turn the light "Off" then back "On".

BATTERIES

The Lumen 170 requires three (3) AAA batteries (not included). Rechargeable AAA batteries may be used, however do not mix old and new batteries and/or battery types. Remove batteries from the device when it will not be used for long periods of time.

NOTE: When replacing the battery cover back onto this device please take caution to align the pin on the cap with the groove on the inside of the threaded opening before tightening. The simple way to do this is to rotate the light to face the ground- the groove will be rotated to the bottom. Hold the cap and notice gravity makes the pin rotate to the bottom. Insert the pin into the groove as you tighten the cap. Please ensure to do this for proper light function. See images below.

WARRANTY

Limited three-year warranty on the light for repair or replacement. Warranty registration information can be found at:
